Section 1

Environmental Responsibility Policy Statement

Our intension is to prevent pollution at the source. In circumstances when waste cannot be avoided, we are committed to recycling, treatment and disposal in ways that minimize undesirable effects on air, water and land.

We will communicate commitment to our environment to all employees, customers and suppliers.

We will educate & train our employees to be environmentally responsible at work and at home.

We will identify and adhere to the legal environmental requirements in all aspects of our operation including purchasing.

We will resolve environmental-related problems which may have been created by past operations or handling of materials.

We are seeking ways to continually improve our business practices so that we minimize our impact on the environment.

We seek to achieve basic requirements and then actively strive for a higher level of efficiency and effectiveness in the following areas:

1. Water
2. Electricity & Gas
3. Purchasing
4. Waste Management

The initiatives outlined here represent our current commitment to our ER and will constantly evolve, develop and intensify as necessary with changes in our environment and the industry in which we operate.
